

PROJECT:
PLOT 7, TOWER BRIDGE
SECTOR:
CONSTRUCTION
SITE PROGRAMME:
6 WEEKS
HIRE PERIOD:
90 WEEKS

7 More London Riverside is the final and largest building within the More London masterplan and provides a new 10-storey, sustainable headquarters for PricewaterhouseCoopers LLP

Premier were approached to provide a temporary building during the construction phase to cater for 500 operatives and 80 staff, which in itself sounds a relatively straight forward project, however with limited space on site the only solution was to erect a 6m high gantry and construct a 5-storey building which was located with 2m of a Grade II listed former fire station and within 3m of the new build construction line. The building itself was based on our PremPlus range and consisted of 35 modules with an overall internal floor area of 936m².

The modular construction comprised open plan offices, welfare facilities, large canteen, security offices, changing areas and a first aid room.
